

Letter to Newcomers in Your Community

Dear New Neighbors,

Welcome to Greenville.

This letter will have to serve as an introduction until I have the opportunity to meet you in person. I am a _____ Dentist, dedicated to keeping your entire family dentally healthy (or a _____ specialist trained to (brief description of your specialty)).

We chose Greenville, a thriving, hospitable city, as our practice site after obtaining a dental degree from _____ School of Dentistry in (city) (if a specialist, add "followed by _____ specialty training at _____ in (city)."). My staff and I now continue our education by attending many courses each year about the latest research, methods, and materials for treating your family (child) with the finest dental care available.

Greenville is an outstanding community, and we hope you enjoy it as much as we long-term residents do. Please call, email, or stop by our office with any questions you may have about your family's (child's) oral health. We look forward to welcoming you as a patient in our practice where we treat all patients as we would our own family members.

Sincerely,

Dr. Dannie Page and Staff
